Assistant Superintendent—Babu Somadev Ganguli

Store-keeper—Babu Jugal Kishore Roy

Overseer—Babu Niranjan Mukherji

Clerk—Babu Tarak Chandra Chatterji

Gate clerk—Babu Bipin Behari Chatterji

The menial staff of the Garden at the end of 1927-1928 comprised in addition to temporary men who were engaged as required—

1 Salutri	3 Sweepers
1 Jamadar	1 Chaprasi
8 Durwans	1 Carpenter
20 Keepers	2 Cartmen
2 Bhisties	1 Syce
1 Cook	1 Scytheman
1 Head Gardener	1 Night watchman
14 Gardeners	

The healthy condition of the collection, generally, has been well maintained No outbreak of serious epidemic has occurred and the casualties were only such as are to be expected among a collection of animals in captivity, many of them in a climate to which they are by nature unaccustomed

The outstanding improvement effected during the year is the construction of the Island Enclosure The old enclosure for the Sambar deer was dismantled and remodelled after the design of the New Extension which has proved so successful The fences and railings were removed and a wide ditch, too deep to be waded across, with a retaining wall in front, was substituted The low lying grounds were raised and levelled and the tank partly filled in with earth from the ditch The enclosure which formerly was unattractive and congested has now been converted into an open space with a view unobstructed by railings in all directions Confinement by these means enables animals of various kinds to be given opportunities of comparative freedom otherwise unattainable It is believed that nowhere else in the world can orang outangs and gibbons be seen living in practically a wild state With them are grouped a tapir, a capybara, rabbits, wallabies, and many kinds of birds all of which dwell together in complete harmony and form a most attractive exhibit

The question of improving the existing Laboratory building and the adjoining grounds and converting them into a dispensary and a hospital suitable for sick animals engaged the attention of the Committee of Management, and a portion of the Laboratory was set apart for a hospital and old and useless material and instruments were sold by auction The flooring of the adjoining

verandahs were renewed The roofs were recovered with tar and cement and the ceilings which had been damaged by leaks in the roof were repaired The adjacent ground which was enclosed by a wall was thrown open, and cleared of vegetation and waste materials, and raised The drainage was improved by the construction of a pucca drain and the whole was converted into a useful self contained block

The godown behind the Reptile House, formerly intended as quarters for the keeper of the Snake House, which had lain vacant for a number of years and been used for stores, was dismantled and the adjoining land cleared thus giving a full view of the Zebra paddock A brick on edge road was constructed on the east side of the paddock, and the general appearance of this part of the Garden has thus been also improved

New paths were laid and gravelled and others widened and altered as necessary Portions of the main drive were remetalled and all paths and roads were covered with surki siftings

The general repairs to the buildings could not be taken in hand during the year 1926 27 on account of want of funds and they consequently were in great need of repair during the year under review, but nevertheless, though urgent general repairs were effected, funds did not permit of all being carried out that might have been done Details are as follows —

The Boundary wall, Burdwan House, Small Carnivora House, the servant's quarters, Superintendent's quarters, Sonebursa Enclosure, Rodent House, Drill and Mandrill House, Sarnomoyi House, the store godown were repaired, sand plastered, colour washed and painted as necessary and in the case of the last two items, extensive repairs were required and executed to the roofs

The following buildings were lime washed and colourwashed—

Dumraon House, Gubbay House, Reptile House, Schwendler House, Refreshment Pavilions, Bear House, Circular Monkey House

In addition, minor repairs to smaller houses, sheds and enclosures were effected

The Gardens generally have been maintained in good order Considerable attention has been paid to the lawns, flower beds, shrubs and trees Many shrubs and trees which had outgrown their original purpose were cut down and with the removal of these obstructions the appearance of the grounds has improved considerably Flowering Annuals were exhibited at the Annual Flower Show of the Agri Horticultural Society of India and the Gardens were awarded several prizes

The financial condition of the Garden is on the whole satisfactory, due to the rigid economy which has been imposed during the past few years The increase in the number of visitors and in the receipts at the gate is attributable in some measure to the return to normal conditions of which mention was made in the last Annual Report But it is also attributable to the attractiveness of the collection and improved methods of exhibition, for both as regards the aggregate total and the number of varieties of animals and birds exhibited, the Gardens contain more specimens than there have ever been in the collection This necessarily involves expenditure, without which the standard of the collection would deteriorate rapidly As the sum available is limited, and, as has been frequently pointed out a margin against unforeseen contingencies must be kept in hand, a careful adjustment has to be made between expenses incurred on the maintenance of the Gardens and collection and that incurred in the purchase of new specimens which, as an additional attraction, may become a source of profit as well as of interest

The following is a comparative statement of visitors and receipts for recent years —

Year	Number of visitors	Receipts Rs	A
1923 24	877,478	64,420	7
1924 25	943,553	67,706	13
1925 26	1,030,647	72,500	10
1926-27	826,211	58,486	4
1927 28	1,107,161	76,701	2

It is to be regretted that in the last Annual Report the figures were inaccurately stated The above are the correct figures

A large number of children under four years of age and school children, attended by their teachers, were admitted free On the occasion of the Fancy Fair on 31st December 1927 and 2nd January 1928 about 17,240 people visited the Garden

In addition 48,475 persons visited the Gardens on free days A detailed statement of the number of visitors and receipts appears in Appendix B

The thanks of the Committee are due to those ladies and gentlemen who have added to the zoological collection by donations, a list of which is given in Appendix C Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted, either because the particular species was already sufficiently well represented, or owing to want of accommodation

The Committee also desire to express their thanks to the following Railway and Steamer Companies for kindly conveying the animals belonging to the Garden free of charge—

E I Railway, B N Railway, B I S N Co, Ltd, through Messrs Mackinnon Mackenzie & Co, and R S N Co, Ltd, through Messrs Macneill & Co

The Corporation of Calcutta at their meeting held on 19th September 1927 sanctioned a grant of Rs 26,233 6 to the Garden for the year under report and the amount of the rate bills in respect of the Garden was adjusted against the sanctioned grant as the rate bills fell due The Committee desire to take this opportunity of expressing their thanks to the Corporation of Calcutta for their generous contribution to the funds of the Garden

Thanks are also due to the Officer Commanding and Officers of the 3 12th F F Regiment for permitting the regimental band to play at the Garden on Tuesday afternoons free of charge

The Committee are much indebted to those members of the public who send their old and broken down horses to the Zoological Gardens for destruction in a humane manner

E H MARSHALL, *Honorary Secretary*

P L BUCKLAND, *President*

First forecast of the cotton crops of Bengal, 1928-29

NOTE — On an average of the five years ending 1926 27, the area under the cotton crops in Bengal has represented some 0 2 per cent of the total area under cotton in India

There are two crops, early and late The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and only to a small extent in other districts The "late" crop is grown in Bankura and Midnapore *As the late crop has not yet been sown, this forecast deals only with the "early" crop*

Character of the season.—Owing to drought the weather was not favourable at the sowing time Subsequent conditions were helpful for the growth except in Mymensingh where heavy showers affected the prospects The present condition of the crop is promising on the whole

Area sown.—The area sown is reported to be 76,998 acres this year, as against 76,752 acres reported in the corresponding forecast of last year

Director of Agriculture, Bengal

PUBLIC

The 1st August 1928

No F-279-28—The following minute of the Indian Statutory Commission constituting the Auxiliary Committee on the Growth of Education is published for general information:—

The Growth of Education in British India

The Growth of Education in British India is, by the terms of the Royal Warrant under which the Indian Statutory Commission is constituted, one of the subjects on which the Commission is required to report. The Royal Warrant further empowers the Commission to appoint, with the sanction of the Secretary of State for India, any person, or persons, to make subordinate enquiries and to report the result to the Commission

With the sanction of the Secretary of State for India the Commission accordingly appoints —

Sir Philip Hartog, K C I E (Member of the Public Service Commission), Chairman,
Sir Amherst Selby Bigge, Bart, K C B,
Sir Saiyid Sultan Ahmad (Vice-Chancellor of Patna University),
Sir George Anderson, C I E (Director of Public Instruction, Punjab),
Raja Narendra Nath (Member of the Legislative Council of the Punjab),
Mrs Muthulakshmi Reddi (Deputy President of the Madras Legislative Council),

to make subordinate enquiries into the growth of education in British India and to report the result to the Commission

The Committee will be designated "The Auxiliary Committee on the Growth of Education", and it will be convenient to describe the Report it is asked to make as the Auxiliary Committee's "Review of the Growth of Education in British India"

The Commission understands its terms of reference regarding Education as requiring from it, not a general survey of the whole field of Education in all its branches and aspects throughout British India, but a Review within moderate compass, limited by the general scope and purpose of the broad enquiry with which the Commission is charged. The Commissioners therefore regard themselves as primarily concerned with Education and its organisation in British India in relation to political and constitutional conditions and potentialities of progress

It is in this sense therefore that the Commission desires the reference to the Auxiliary Committee on the Growth of Education to be interpreted Subject to this, the Committee will be free to pursue its enquiries and to draw up its Review in whatever way seems best to it

It is the Commission's intention, without excluding such general evidence as it may receive on the question in the ordinary course of its enquiry, to set apart a portion of the time available during its next visit to India for the special consideration of that part of its terms of reference which deals with the Growth of Education in British India, and it will desire to have the Review of the Auxiliary Committee before it in good time for this purpose After the Committee's Review has been received, and the Commission has had sufficient time to digest its contents, it is hoped that there may be an opportunity for the Commission to discuss the contents of the document, probably in some place in Northern India, with the members of the Auxiliary Committee or some of them In view of the great importance of the subject, the Commission desires to give the Auxiliary Committee the longest time possible for its work, but on the other hand it is important that the discussion between the Commission and the Committee on the Committee's Review should take place before the Commission's tour of enquiry has progressed too far For these reasons it is desired that the Auxiliary Committee's Review should be in the hands of the Commission not later than 15th December 1928 The Review will be treated as confidential* in the first instance, but it is contemplated that it will at a later stage form part of the documents published as an Appendix to the Commission's Report

* It will of course be made available to Committees of Indian Legislatures collaborating with the Commission

DEPARTMENT OF INDUSTRIES, BENGAL.

Bengal Tanning Institute.

Note on the careers of the past students.

The Bengal Tanning Institute provides a two-year course of instruction in modern tanning A demonstration tannery equipped with necessary machinery and a chemical laboratory are attached to the Institute The training is imparted through practical work and lectures Manufacture of different varieties of commercial leather from local raw hides and skins is practised at the demonstration tannery, and the chemical analyses required in modern tanning are taught at the laboratory Course of lectures is delivered on (1) Principles and methods of tanning and (2) Analytical chemistry of leather manufacture

A previous knowledge of chemistry is helpful in following the course, but those who join the Institute without such knowledge are at first taught elementary chemistry by special lectures and laboratory work

The training offers a new career to young men, and it is gratifying to note that the opportunities provided have not been neglected Quite a number of boys have been trained and the after careers of most of them are encouraging

Thirty-nine students have passed out of the Institute up to date, of whom eight took only one year's training and the rest completed the full course Eight among the past students have started small tanneries, two of which are known to have been equipped with machinery. Five are doing business on their own in leather goods manufacture, and sixteen were either provided with or have themselves secured services as tanning chemists and tannery assistants Two are working as assistants in laboratories and one in a distillery Of the remaining seven, most of whom have passed out very recently, definite information about their activities is not yet known They have not had sufficient time to stabilise their position, but some are reported to have started small tannery concerns. It will be thus seen that more than 82 per cent of the trained students of the Institute have been suitably employed

Annual Report of the Royal Botanic Gardens and the Gardens in Calcutta and of the Lloyd Botanic Garden, Darjeeling, for 1927-28.

ROYAL BOTANIC GARDENS.

1. **General.**—As the main collections of the gardens consist of trees and shrubs mostly deep-rooted, the shortage in the monsoon rainfall recorded for Bengal passed without any deleterious effect and, had the usual cold weather showers come, the light monsoon might even have been welcomed as a convenient means of keeping the undergrowth in manageable condition But the June till September shortage, followed by a cold weather during which not a single shower fell and when even morning mists were wanting, gradually brought the garden in January and February to a state such as must have been very rare in its history Deciduous species seemed to have an earlier than usual leaf-fall while evergreens flagged to an unhealthy degree and many of the lawns became scorched till, all grass having disappeared, they recalled the appearance of the deserts of Upper India It is indicative of the fertility of the soil and of the rapid transformation that a water supply will effect that, with the advent of rain in March, all hands were again busily engaged at the end of the year under review in keeping the undergrowth down

Annuals with plants established in the Palm and Orchid Houses and the herbaceous collections generally—the watering of which is a routine feature of garden work—showed no ill effects from the prolonged spell of drought

The annuals were somewhat late but gave a welcome relief of colour to the garden once they did come into flower and were quite up to the usual standard of past years A fresh supply of Orchids was obtained from Assam and the Darjeeling District Apart from some species of Dendrobium, Vanda, Phalaenopsis, Cypripedium and Cattleya, which last and bloom for several years in the plains, fresh supplies of other Orchids require to be continually imported These fail to survive more than a couple of years in the unnatural conditions they find here, but they make such welcome additions to the Orchid House that their re-importation is always worth while There was a good display of Orchids at the end of the year, and the house in which they are staged is probably more frequented by the visiting public than any other plant house in the garden Indeed, many people seem to defer visits until the Orchids come into flower

The large Palm House was selected for special attention during the year and while work on it is not yet completed, already it presents a much more pleasing aspect For some time past it has been so over-crowded that the variety of its collections tended to become obscured in the mass of its vegetation With the opening out this defect has disappeared Variety rather than scenic effect should be the key-note of all such houses and this will determine all future additions to it

The following additions amongst others were made to the Palm House —

Calamus Lindeni, Stevensonia grandifolia, Actinophloeus Sanderiana, Acanthophoenix crinita and *Deckenia nobilis*

Species planted out to permanent and requisite geographical position in the garden include *Cestrum diurnum Averrhoa Carambola* sweet variety, *Terminalia pyrifolia Terminalia bialata, Acacia pseudoe burnea, Dodonaea viscosa, Michelia fuscata, Grewia occidentalis, Millettia Caffra, Geijera parviflora Cassia laevigata, Brysonima crassifolia, Brownea macrophylla, Anona Cherimolia and Chorisia insignis*

Some of these merely represent the replacement of species which had died or been removed, others are new to the garden

The loss of one of the Conifers—*Juniperus recurva*—during the year calls attention to the need for the replacement of several belonging to this group of plants Apart from some possible members of the genera Araucaria Agathis and Pinus the Conifers cannot be said to flourish under garden conditions They constitute a group which only just tolerates Bengal but to many visitors their unfamiliar habit forms a source of attraction, and the symmetry of their outline makes them an easy and desirable group of plants to fit schemes for the improvement of garden scenery Attempts are being made to add to the comparatively small list falling under the group

Attention has been called of late to the value of mahogany grown in the garden, and claims are made that the wood of this tree locally grown surpasses most other mahoganies known to commerce Enquiries have originated with a view to conserving such supplies as may become available here for Government House purposes at Delhi

The garden mahoganies of which there are at least three species, must be the oldest in India They originated from seed from the West Indies and there can be no doubt that the wood produced is of a very fine class Doubtless there are many areas in Bengal where the true mahogany could be grown It would form quite a useful shade tree for country road sides It will last for well over a hundred years and if at the end of this time its wood can be prized as equal to the best in commerce, there are abundant reasons why it might now be occupying the bare and unutilized road side spaces of this province In this connection it will be of interest to recall that the East India Company were influenced in their support to the foundation of the garden by the belief that it would prove an institution capable of determining what woods could be grown to purpose in the Indian possessions

Although it finds its centre of distribution further to the south of the Indian peninsula the Indian Satinwood, *Chloroxylon Sweetenia*, is another tree that reaches considerable dimensions in the garden It also produces a very fine wood here but its value in comparison with the Satinwood of commerce is not known

Of the commercial value of the mahogany, *Sweetenia macrophylla*, first known to science from this garden, less is known This is a much quicker growing tree and it seems unlikely that its timber would possess anything like the value of the older species

The Students' Garden, for which part of the economic ground has been utilised and to which reference was made in last year's report, continues a centre of attraction for all those visitors who take an interest in the botanical side of gardening It has been begun in such a way as to allow of expansion and, while the number of species is yet limited, there is no reason why it should not develop into an area containing, named and labelled with notes of interest, many of the common plants found in the Bengal plains With arboreal species already represented in the garden, the object should be to devote this section to herbaceous and shrubby vegetation For the present, its expansion is limited by the necessity of maintaining an extra labour force to carry water during the dry season

During the coming year, and now that the Orchid and Palm Houses are in a better condition, special attention will be paid to renewing and adding to the garden labels While the cast iron label with double ground fixture now utilized for several years is an improvement on the old type in appearance, experience has shown that it fails to withstand the usage it too often becomes subjected to Many of these labels are broken, and it is feared a reversion to the old type or a modification of it has become necessary The disadvantage of the old type lies in the repainting of names that its usage entails, but it is less easily damaged than the modern type and considerations of utility determine a reversion to it

Several major schemes for the improvement of the garden are under the consideration of Government Administrative approval to the construction of new coolie quarters is anticipated and work on them will then merely await the provision of funds A site at the back of the economic ground has been chosen for the new blocks and a tube well centrally placed will provide a safe supply of water for the coolies

The conditions under which the labour in these gardens at present lives have given cause for much anxiety during the recent widespread epidemic of cholera But for the presence of an energetic medical officer who induced the coolies to submit en masse to inoculation and who, in spite of objection for interference with the water supply, had the drinking water tank treated, a spread of the epidemic to the garden would almost certainly have taken place The few cases of cholera that did occur were promptly dealt with, but it cannot be over emphasised that the present housing arrangements are a continual source of anxiety to those responsible for the health of the garden, and that work on the new housing scheme with its inclusive water-supply should proceed with as little delay as possible

Reference has so often been made in past reports to the state of the garden roads that it is pleasing to note these also are scheduled for the attention they require Here again, however, money awaits a favourable vote and while this is so, any improvement on the roads depends on the meagre savings that may be spared from garden funds proper Nothing short of resoling and surface tarring will now give the roads the condition that modern traffic demands

2 **Plant and seed exchange.**—Some 39,000 living plants were distributed during the year As usual, India itself forms the main area for distribution but small consignments for despatch abroad are always being prepared Its geographical position in relation to America, to Europe and to West and South Africa, from all of which requests for living plants frequently arrive, makes India a difficult country from which to cater for foreign correspondents, for, no matter what care is taken in packing, the long journeys with no attention en route often prove more than consignments will stand

About the usual numbers of packets of seeds were distributed and received throughout the year

3 **Herbarium and Library.**—The appointment of a permanent Curator of the Herbarium has allowed of arrears of work in this Department being overtaken Routine work in acquisition, identification distribution and loan has proceeded uninterruptedly throughout the year

Some 1,400 specimens have been distributed, including a fairly large collection of Chittagong district plants to the herbarium of the Royal Botanic Garden, Edinburgh

Of plants received, some 1,500 have been mounted and placed in their proper positions in the cabinets

Identifications for the herbarium or for correspondents cover a range of 1,618 specific names, but, as many species were identified in different collections and at different times, the actual number of specimens examined greatly exceeds the sixteen hundred odd

Some two thousand specimens were loaned out during the year, the largest loan being a collection of mosses for Dr Bruhl's use in connection with his forthcoming work on the group as it occurs in South Eastern Asia A good deal of arrear work has been overtaken in the mounting of 5,158 sheets in addition to the usual repairing of specimens already incorporated

Besides attending to the routine of the Herbarium, the newly appointed Curator has devoted part of his time to a study of the genus Avicennia and to an analysis of the Algal Flora of the Chilka Lake

Much valuable assistance in the work of the section has been given by Messrs Narayanaswami and Srinivasan, the former of whom has brought to a stage near completion an examination of the exact geographical distribution of the collections of Wray, Kunstler and Scortechini When finished this work will probably be given to the Asiatic Society whose journal already contains the materials for a Flora of the Malay Peninsula to which the information in Mr Narayanaswami's paper should form a valuable addition

Mr Srinivasan, Second Assistant for systematic work, whose appointment to the department of Botanical Survey was effected during the year, was engaged generally in becoming acquainted with the range of his new duties To gain experience in field work he was on tour towards the end of the year to the Garo Hills from which he has brought back a carefully prepared collection of some 1,000 specimens representing 250 300 species

Dr Cowan, who held charge as Officiating Superintendent for the first seven months of the year, completed his work on the Trees of Northern Bengal and his analysis of the Chakaria Sunderbans Flora

A scheme for the extension of the Herbarium is under consideration and it is essential, if the continuously accumulating collections are to be properly looked after, that the additional building be undertaken at no distant date Cabinets in excess of what are now housed, cannot be added to the present structure the capacity of which is already limited by its dimensions and lighting arrangements

Additions to the library have been limited to serials in view of the necessity of conserving funds for the preparation of Signor Martelli's plates of Asiatic Palms This work will be finished during 1928-29, but library funds are likely to be taxed thereafter in the preparation of plates for Sir David Prain and Mr Burkill's monograph of the Asiatic Dioscoreas The orders issued last year restricting the number of plates required by Signor Martelli for the illustration of the palms have been cancelled, and work on them again proceeds in accordance with the author's views of what is necessary In the absence of special grants for work of this description library development has to accommodate itself to the double purpose its fund serves

4 **Publications.**—No purely garden publications apart from seed lists of the Royal Botanic Garden and the Lloyd Botanic Garden were issued during the year Dr Cowan's Trees of Northern Bengal is in the press, and reference is elsewhere made to the progress of work on the Asiatic Palms

Besides garden publications proper, the Flora of the Chakaria Sunderbans, a survey publication by Dr Cowan, appeared during the year as Volume XI, No 2 of the Records

5 **Finance.**—Out of a total budget allotment of Rs 42,785 for staff and permanent establishment, Rs 42,593 were spent Rupees 800 were surrendered to Government from the allotment for clerical establishment and garden staff, but this was practically balanced by an excess expenditure of Rs 751 under 'Pay of Officers—voted" The grant of Rs 31,000 under Temporary Establishment" was practically all used up and, after a surrender of Rs 5 200 from a grant of Rs 38,720 under other heads, there was an expenditure of Rs 32,913 and a saving of Rs 607 After a total surrender of Rs 6,000, there remained a small net saving of Rs 7 on the year's budget On the revenue side, the sale proceeds of surplus plants amounted to Rs 494

6 **Staff.**—The Officiating Superintendent, Dr J M Cowan, held charge till the undersigned returned from leave on the 20th November to resume his former duties Mr K P Biswas, Curator of the Herbarium, was confirmed in his appointment after a year's probation on the 1st February 1928

Mr W V North, substantive holder of the post of Curator of the garden was on long leave till the 19th July 1927 when he resigned his appointment Mr Mitra, who filled the leave vacancy, continued acting after Mr North's resignation and no permanent Curator has yet been appointed Messrs Jones and Joneja occupied the posts of Assistant Curator and first Overseer, respectively

The permanent Head Clerk, Babu Santosh Kumar Mitra, died while on long leave preparatory to retirement, and the officiating clerk Babu A T Bannerjee took charge substantively of the post from the 10th August 1927

In the at times difficult atmosphere of unrest and discontent amongst the labour force, all subordinate members of the staff and the clerical establishment have carried on their duties tactfully and faithfully

During the year gazetted rank was conferred on all members of the Provincial Gardeners' Service

CALCUTTA GARDENS.

Work in these gardens was again mainly of a routine character

The display of cold weather annuals, a feature of gardening calling for more attention in these than at Sibpur, was quite up to the standard of past years The proximity of a municipal water-supply system renders the attention beds require after planting out less of a drudgery here than it is at the Royal Botanic Garden

Some variety to the gardens was given by the formation of new flower beds, and the colour schemes seemed to draw the attention and admiration of visitors

A rearrangement of the North East part of the Curzon Gardens has been decided on with a view to improving the rather desolate corner at present utilized by the Tramway Company New plots of trees and shrubs are to be put in and it is hoped to render less obtrusive the unsightly structures that have disfigured this corner of the maidan for some years While the condition of this corner detracts from the appearance of the Curzon Gardens it is outside the garden area proper, and the improvement is, therefore, not being carried out departmentally

In the Eden Garden some fifty new shrubs or trees suitable from the horticulturist's point of view were added during the year A rockery was rebuilt near the Pagoda lake and the lake itself, which has become badly silted up was partially excavated

Mr Mitra acted as Curator while Mr S N Basu was Assistant Curator and Mr Quasem Ali, Overseer, throughout the year The total allotment for the three Calcutta Gardens was Rs 23,372 of which Rs 23,020 were spent Passes for fishing in the garden tanks realized Rs 176

LLOYD BOTANIC GARDEN, DARJEELING.

With a mild winter during which no damage from snow or hail calls for report, and a rainfall better distributed than was the case in the plains, the year may be said to have been favourable for the garden

A part of the road from the south gate which had sunk in places was relaid and other roads given surface repairs Extensive repairs were executed to cold frames many of which were renewed and improved by the fixing of iron gauze as a protection against hail Other improvements involved attention to the garden fencing, the lavatories and the Summer House

Of seeds and bulbs received for annual plot purposes those from Europe gave good results, the Japanese supply did not do well Fifty-four young trees and shrubs were planted out in the garden to replace casualties or as species new to the collections

A list of seeds available from the garden or possible of collection in the district was prepared and issued to correspondents on the distribution list while the catalogue of garden plants is being revised and brought up to date

Some 7,773 packets of seeds, 2,481 plants seedlings and 45 tubers were distributed, and 247 packets and 77 plants received

Mr Leslie, who has held charge throughout the year, continues to maintain the very high standard of work set by his predecessor and that the gardens are attractive and appreciated may be inferred from the large number of visitors—42,021—willing to undertake the climb back that a visit to them entails A special feature of the Curator's work continues to be the collection of East Himalayan plants and seeds for correspondents in India and abroad, and the writer's thanks are due to Mr Leslie for the energetic manner in which he has tackled this somewhat specialized duty Extensive tours for purposes of collection were made and the requirements of botanical and horticultural institutions throughout the world as fully attended to as was possible

There was a net saving of Rs 477, mostly effected under purchase of seeds and implements, out of a total budget allotment of Rs 21,857

HIGH COURT NOTICES.

ENGLISH DEPARTMENT—CIVIL.

General Letter No 11, dated Calcutta, the 30th July 1928

From—H C STORK, ESQ, I C S, Registrar of the High Court of Judicature at Fort William in Bengal, Appellate Side,

To—The District Judges in Bengal and Assam

I am directed to address you on the subject of gentlemen who were enrolled as Vakils of this High Court before the 1st July 1928, and who practise wholly or ordinarily in the mufassal courts It appears that considerable doubt exists as to what their position is under the Indian Bar Councils Act, 1926, which came into force in Bengal on 1st July 1928

2 I am to say that all the courts subordinate to this High Court should act for the present on the footing that the Indian Bar Councils Act does not abrogate the rights accruing to Vakils by virtue of section 4 of the Legal Practitioners Act, XVIII of 1879

3 Under the Indian Bar Councils Act, however, no legal practitioner has a right to practise in the High Court unless he gets himself enrolled as an Advocate of the High Court under that Act Any Vakil, therefore, who desires to retain that right, or to claim any of the advantages given to Advocates under the Indian Bar Councils Act, or to wear any robes that may eventually be prescribed for Advocates, is bound to get himself enrolled as an Advocate under that Act To do this, he should, in the first instance, pay the sum of Rs 10 required by the Act to the Chairman of the Bar Council of this High Court, who will furnish him with a receipt This receipt he should submit to the Registrar, Appellate Side, High Court, with evidence of his identity, that is to say, by giving the year and date (when known) of his enrolment as a Vakil, his name in full, with degrees and titles, if any He will then be enrolled as an Advocate under the Indian Bar Councils Act by the Registrar who will forward him a certificate to this effect

4 I am to request you to inform local Bar Associations and individual enquirers accordingly

III **Election to Vacancies, etc.**—(1) The annual election of wards was held on Thursday, the 22nd December There were 7 actual vacancies, but, in accordance with a scheme drawn up by the Rev Father Vander Schueren, and approved by the Governors, so as to ensure a fixed number being elected each year irrespective of vacancies, 8 vacancies were advertised, and 57 applications were received These were considered by a sub-committee consisting of (1) the Ven'ble Archdeacon C J Grimes, (2) the Rev Father F Keyeux, S J, (3) the Rev E S Johnson, and Mr Maurice Remfry, and on their recommendation eight girls were elected and two kept as reserves pending further vacancies Of these three were placed in the Loreto Convent, Entally, one in the Calcutta Girls' School, one in St Paul's Mission Home, two in St Thomas' School, Kidderpore, and one in the Loreto Convent, Asansol

(2) Of the seven wards withdrawn during the year, five had attained the age-limit of 17, one was withdrawn by her mother, as her circumstances had improved, and sent to a day school, and another was removed as she was absent without report for more than six months

(3) Of the girls who had been withdrawn during the previous year and in respect of whom reports have been received during the year under review, one is engaged in teaching at the school in which she was educated, and one has joined the Bengal Telephone Company

(4) At the close of the year there were 107 wards on the rolls against 104 in the previous year They were distributed as follows —

Loreto Convent, Entally { 1st Boarding 33 / 2nd Boarding 18 }	...	51
Calcutta Girls' High School	.. ... .	12

2 Fatherless or motherless, or deserted by their fathers or mothers .	37	15	6	58
3 Those who have both parents alive	8	6	3	17
Total ..	65	32	10	107

(6) The health of the wards was on the whole satisfactory, but one ward who was in poor health was transferred to a school outside Calcutta and another was sent to the Meath Convalescent Home, Shillong, for a few months Wards having defective sight were supplied with spectacles, and those whose teeth required attention received it

IV **Education and Maintenance.**—(1) The nature of the education given to the wards was that prescribed for Higher Grade Schools under the Code of Regulations for European Schools in Bengal, and in a few cases that for Secondary Schools

(2) The Governors are anxious that their wards should not be allowed to drift when they leave school and have accordingly asked the Visiting Governors to make, in consultation with the school authorities, some definite proposals, where this seemed desirable, in regard to the wards who have attained, or are about to attain, the age of 15, so that the last two years of their school life may be spent to the best advantage and be a preparation for earning a living One ward was, on the recommendation of the school authorities, transferred from a Secondary to a Higher Grade School as she was found to be unfit for secondary education

(3) One ward was sent up for the Trinity College of Music (Theory and Practice) and passed with honours Another was sent up for the School Certificate Examination and passed, while the third who was sent up for the Government Scholarship Examination, failed Some wards also appeared at the Cambridge Local Examinations held in December 1927. The results are not yet known.

(4) Under the rules a ward is not ordinarily allowed to remain on the Fund after the age of 17, when an outfit grant of Rs 100 is generally given on application, to enable her to make a start in life In cases where wards wish to be trained as teachers and have the support of the school authorities, or where some special training is recommended, or are preparing for higher examinations, some extension of the period of benefit is generally allowed Four wards were granted extensions during the year under review

(5) The monthly average cost for the education and maintenance of each ward amounted to Rs 26-11 against Rs 26-3 6 in the preceding year

(6) The amounts paid under the different heads of expenditure were as noted below —

V **Inspection.**—The Rev Father F Keyeux, S J, was appointed Visiting Governor for the first half, and Mrs H Barton for the second half, of the year They visited the schools in Calcutta having Bruce wards Father Keyeux reports that the wards, in most cases, made on him the best impression, he found them in good health and in good spirits, with nice and open manners He pointed out that the want of punctuality on the part of parents or guardians to send the children back after the holidays was a matter of complaint nearly everywhere The Governors have accordingly requested the school authorities to report at once the name of any ward who does not punctually return to school after the holidays Mrs Barton reports that the wards all appear to be contented and happy, well cared for and in the best of health It appeared to her that the girls were properly placed and that progress in study was satisfactory all round

VI **Meetings.**—Four meetings were held during the year, and among the resolutions passed the following may be noted —

(a) That no ward elected be confirmed without a satisfactory medical certificate being submitted during the first year

(b) That schools be asked to send medical reports annually on all wards

(c) That no ward should be removed from school before the age of 17, without the previous permission of the Honorary Secretary in writing, and that the Visting Governor should first note upon the case

E F OATEN,

Honorary Secretary to the Governors

RESOLUTION ON THE REPORT ON THE POLICE ADMINISTRATION IN THE BENGAL PRESIDENCY FOR THE YEAR 1927.

GOVERNMENT OF BENGAL.

Police Department.

CALCUTTA, THE 29TH AUGUST 1928

RESOLUTION—No 4231 PL

READ—

The Report on the Police Administration in the Bengal Presidency for the year 1927

Mr T C Simpson, C I E , held the post of Inspector-General of Police from the beginning of the year until the 11th April, when he was succeeded by Mr A E O'Sullivan who officiated for the rest of the year

Eastern Frontier Rifles.—The Battalion was maintained at full strength, and in spite of difficulties arising from the fact that detachments were frequently on duty in different parts of the province, the discipline and efficiency of the unit were highly satisfactory While pleased with the present state of the Battalion as shown by the good work done, and the small number of dismissals and desertions, the Governor in Council views with some concern the steady increase in the number of resignations during the last five years and will give careful consideration to any scheme for making service in the Battalion more attractive

Recruitment and Health of the Civil Police.—There was an increase of 149 in the permanent sanctioned strength of the subordinate police, a considerable portion of which was due to the strengthening of the town police in certain mufassal stations The Governor in Council trusts that this addition to the force will have as satisfactory results as those which the Inspector-General says have followed the strengthening of the town police in Barrackpore in 1926

The number of vacancies in the men's ranks was 405 which is less than 2 per cent of the sanctioned strength of these ranks and, therefore, not alarming taken by itself, but the casualties for the year indicate that all is not well with the force No fewer than 1,128 men resigned, while there were 121 desertions and 335 deaths Out of 484 men who retired on pension, or gratuity, no fewer than 355 were invalided Such heavy casualties react seriously on the efficiency of the force because they have to be made good by recruiting large numbers of men who remain ineffective for at least the training period of six months The ineffective period, in fact, is generally longer, as the number of men who can be trained at Sardah is limited to 700 at a time, or 1,400 in the course of a year, whereas in 1927 the number of recruits was over 2,700 Thus, in addition to men undergoing the recruits' training course at Sardah, there were large numbers of untrained men in the districts As explained by the Inspector-General, untrained men including men at Sardah are not available to take the place of trained men on leave, with the result that leave had to be restricted mainly to men for whom it was necessary on medical grounds The bad effect of this on the contentment and health of the force needs no elaboration Convinced by the evidence provided by the figures of casualties that the conditions of service in the police were unsatisfactory, Government decided to ask the Legislative Council for a grant to make it possible to raise the pay of constables from the present scale of Rs 16—20 per month to one of Rs 20—24 which, however, was refused The demand was restored by His Excellency the Governor in exercise of his powers under section 72 D of the Government of India Act

The Governor in Council has in recent years commented on the effect of bad housing conditions on the health of the force He, therefore, regrets that inadequacy of funds made it impossible to make any great improvement in this direction, but he trusts that as new type plans of less expensive buildings have now been prepared, progress will be made with a comprehensive building scheme to be financed out of loans His Excellency in Council observes that in the United Provinces, with the aid of a large loan from the Government of India, an extensive building programme has been drawn up, and trusts that it will be possible to take similar action in Bengal where conditions of service are probably much more trying than in the United Provinces

Discipline.—Although there was an increase in the number of men judicially and departmentally punished as compared with 1926, the Governor in Council is pleased to read that there was a big decrease in the number of major departmental punishments and also in the number of criminal charges preferred by private individuals against the police No fewer than 48 per cent of such of these cases, as were disposed of, were summarily dismissed, 40 per cent ended in acquittal, while only 11 6 per cent ended in conviction, these results clearly indicating the danger to which Police officers are exposed from maliciously false charges The counter-case is a common form of tactics in private criminal litigation in Bengal, and it is evident that such tactics are frequently resorted to by persons against whom police officers have to proceed in the course of their investigation The Governor in Council shares the Inspector-General's regret that action was taken against only a very small proportion of persons bringing false complaints against police officers, and agrees with him that the prosecution of such complainants would go far to reduce their number The results of civil suits instituted by private individuals against police officers were also satisfactory from the point of view of the police, only one case out of seventeen disposed of in the course of the year being decided against the defending officer

Crime Statistics.—As compared with 1926, there was an increase in the total number of cognizable cases reported but the figures are considerably less than those of 1924 and 1925 This remark applies also to the figures of true burglary and theft cases, but dacoities show a big increase as compared with 1925 and 1926, though they are still well below the number reported in 1924 The Governor in Council agrees with the Inspector-General that bad economic conditions are largely responsible for the increase

His Excellency in Council notes with satisfaction the decrease since 1924 in the number of reported cases of crime on the railways, especially on the East Indian Railway where the figures have fallen from 6,273 to 1,876

The percentage of cases brought to trial was practically the same as in 1926, and among such cases there was a slight improvement in the percentage of convictions, Bengal again comparing favourably in this respect with other provinces among which only Madras shows better figures The Governor in Council has read with interest the Inspector-General's remarks on the work of District Detective Departments, and is prepared to consider proposals for the establishment of such departments in some of the districts in which they do not now exist

The Inspector-General has again brought to notice the delay in the disposal of cases brought to trial Since 1924 there has been a steady decline in the percentage of cases in which there have been only two remands, and there has also been a considerable increase in the actual numer of cases remanded more than six times The Governor in Council is satisfied that one of the reasons for this unsatisfactory state of affairs is that the magisterial staff is inadequate, and has decided that the number of Magistrates should be increased if funds can be made available for the purpose He has also directed Commissioners of Divisions to satisfy themselves that orders which have been issued with a view to minimise delay

are duly observed by District Magistrates and Subdivisional Officers, while police officers have been directed to eliminate, as far as possible, such causes of delay as the undue prolongation of investigation after the arrest of suspected persons, the production of an unnecessarily large volume of evidence, and the failure to secure the attendance in Court of prosecution witnesses

The Inspector-General has given instances of inadequate sentences and the inappropriate use of section 562 of the Criminal Procedure Code under which certain classes of convicted offenders may be released on giving security for their good behaviour The Governor in Council desires the Inspector-General to impress on local police officers the necessity of bringing such cases to the notice of District Magistrates without delay as they occur

Rural Police.—The Governor in Council notes with regret the fact that the Inspector-General again finds it necessary to remark on the unsatisfactory state of the rural police, but hopes that as union boards acquire experience and grow more efficient, the position will improve He trusts that in his future reports the Inspector-General will be able to devote some space to an examination of the extent to which these bodies have shown a real interest in the prevention and detection of crime and have co-operated with the regular police in such work

Revolutionary Crime.—There was only one overt criminal act of a political character in the course of the year, and Messrs Armstrong and Lowman are to be congratulated on the success of their department in preventing a recurrence of the outrages which were so prevalent some years ago, but in view of the persistent attempts on the part of certain persons both in India and abroad to disseminate propaganda of a revolutionary character, the Governor in Council is convinced that constant vigilance on the part of the Intelligence Branch is essential

His Excellency in Council has read with pleasure the list of officers whose services have been specially brought to his notice and thanks Mr O'Sullivan and all ranks of the force for the good work which they have done under conditions which are not always encouraging

Order —Ordered that copies of the resolution be forwarded to the Inspector-General of Police, Bengal, the Commissioner of Police, Calcutta, and all Commissioners of Divisions, for information

Ordered also that the resolution be published in the Calcutta Gazette

By order of the Governor in Council,

W S HOPKYNS,

Chief Secretary to the Government of Bengal (Offg)

RESOLUTION

TARIFFS.

Simla, the 1st September 1928

No. 235-T. (24)—1. The report of the Tariff Board regarding the grant of protection to the match industry was published for general information this morning

2 The Government of India accept the finding of the Board that the match industry in India fulfils the three conditions laid down by the Indian Fiscal Commission and should be protected The Board recommend that the present duty of Rs 1-8-0 per gross should be maintained and converted into a protective duty The Government of India accept this recommendation and propose to introduce legislation during the coming session to give effect to this decision

3 The Government of India agree with the Tariff Board that no limit should be fixed for the period of protection They do not contemplate, however, the retention of the duty at the high rate of Rs 1 8 0 per gross for any long period This high rate of duty is necessitated mainly by the existence of an international combine with large financial resources and controlling the manufacture and sale of matches in a large part of the world, and partly by the preference displayed by the consumer for the imported article, a preference which should gradually diminish as the match made in India establishes its reputation If it became evident that the Swedish Match Company had definitely adopted a policy of supplying the Indian market by matches made in India, and if it appeared that the prejudice against the Indian match, similar in quality to the imported match, was disappearing the amount of duty would be open to reconsideration

4 The Tariff Board consider that the manufacture of matches is not a fit industry for development on cottage lines, and cannot recommend any special measures for the encouragement of cottage match factories The Government of India accept this finding

5 The Tariff Board recognise that in certain circumstances an excise duty may properly be levied on matches manufactured in India, and the Government of India agree that conditions may arise rendering the imposition of such a duty desirable They do not, however, contemplate the imposition of an excise duty at present

6 The Government of India accept the finding of the Board that in present circumstances no action is called for against the Swedish Match Company on the ground of unfair competition The Board recommend that, should developments indicate that the Company is acquiring undue control to the detriment of the Indian industry, Government should take steps to safeguard this industry The Government of India consider that if it appeared probable that the Swedish Match Company would obtain a monopoly of the manufacture and sale of matches in India, this would create a new situation which would necessitate a re-examination of the position

STATEMENT OF OBJECTS AND REASONS

Evidence has accumulated recently of the subversive intentions and activities of the Communist International generally, and in particular of the efforts it is directing against India The general policy of the Communist movement is to rouse a spirit of discontent and lawlessness in the masses, whether industrial or agricultural, with the ultimate object of destroying by violence both the Government established by law and the present economic organisation of society and substituting what they describe as the dictatorship of the proletariat For the promotion of this movement, in India as in other countries, the Communists depend largely on the work of propagandists who are despatched to the country for the purpose of forming organisations intended to promote and spread communistic ideas and doctrines, and of creating general unrest among the masses It is not reasonable that these agents of communism, if they happen to obtain entrance into India, should be allowed to stay in India with the object of undermining the whole structure of the life of the community The Bill, therefore, is designed to provide a power of removing such persons provided that they are not Indian British subjects or subjects of a State in India Clause 2 has been drawn so as to define, as strictly as possible, the class of persons against whom these powers can be exercised

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary forecast of the Bhadoi Crops of Bengal, 1928-29.

(NOTE—On an average of the five years ending 1926-27, the area under autumn rice in Bengal has represented some 6 0 per cent of the total area under rice in British India

Character of the Season.—At the outset drought during February and March interfered in some places with the preparatory tillage and sowings In April and May, however, the rainfall in West Bengal was generally moderate and was above the average in East and North Bengal As a consequence sowings and germination were, on the whole, satisfactory Subsequently timely monsoon showers generally favoured the growth and development of the crops, but slight damage was caused by excessive rain and flood in the 24-Parganas, Nadia, Murshidabad, Midnapore, Howrah, Malda and Bakarganj On the whole, the season may be regarded as a favourable one

Acreage.—The total acreage sown with the different *bhadoi* crops this year is reported to be 6,391,700 acres as against 5,828,900 and 5,833,100 acres respectively in the corresponding and final forecasts of last year Of this, the area under *autumn rice* is estimated at 5,599,600 acres as against 5,069,400 and 5,072,400 acres respectively in the corresponding and final forecasts of last year The increase in area is attributed to favourable weather at the time of sowing

Outturn.—According to District Officers' estimate the outturn of the different *bhadoi crops* for the Presidency works out at 80 per cent of the normal this year as against 76 and 80 per cent respectively in the corresponding and final forecasts of last year

The **autumn rice** is estimated to yield an outturn of 80 per cent of the normal for the Province this year as against 85 and 80 per cent respectively in the corresponding and final forecasts of last year It is my opinion that the outturn of autumn rice is an under-estimate and that the crops will not fall short of 95 per cent of the normal this year

DEPARTMENT OF AGRICULTURE.

First Forecast of the Winter Rice Crop of Bengal, 1928-29.

(NOTE—On an average of the five years ending 1926-27, the area under winter rice in Bengal has represented some 18 4 per cent of the total area under rice in British India)

Character of the season.—During the months of February and March the weather continued practically dry excepting for occasionally light and scattered showers in some North and East Bengal districts Preparatory tillage for deep-water paddy progressed slowly In the first part of April moderate rain fell almost all over the Province facilitating sowing of deep-water paddy generally Good showers in May helped the sowing of transplanted winter paddy in seed-beds and benefited the growth of the germinated deep-water paddy crop The monsoon having established itself earlier than usual, transplantation of paddy seedlings commenced in good time Good rainfall in July and August greatly favoured this operation and about normal sowings are expected for the Province as a whole The present outlook, so far, is very promising although slight damage by excessive rain is reported from places

Acreage.—According to the figures returned by the District Officers, the total area under winter rice is 15,112,700 acres as compared with 13 193,900 and 13,210,100 acres in the corresponding and final forecasts of last year The increase in area is attributed to favourable weather at the time of transplantation

Outturn.—From the summary of the district returns appended it will be seen that Khulna reports more than a normal crop, seven districts expect a normal crop and the rest 75 to 95 per cent of the normal

According to the above estimates, the Provincial outturn works up to 93 per cent as against 79 and 78 per cent of the normal estimated respectively in the first and final forecasts of last year I consider the outturn as expected at present may be placed at normal or 100 per cent
